CERTIFICATE VALID FROM:

Aug 29, 2019 To Aug 28, 2020

AUDIT TYPE:

Announced Audit

AUDIT SCOPE:

Review of the harvest practices of a conventional radish growing operation with four workers mechanically harvesting radishes. The harvest machine uses multiple sets of parallel belts grip the tops and carry the stalks up the harvester, trims the tops, and conveys the radishes to a wagon pulled behind the harvester. The wagons are taken to the central farm base for rinsing with single-pass fresh well water (no antimicrobial used) and loaded onto specialized (Nhytemp™) trailers for transport to a cooling and packing facility. Harvest occurs primarily from June to November.
